

STOCKPORT
METROPOLITAN BOROUGH COUNCIL

Family Context Tool

What is the Family Context Tool?

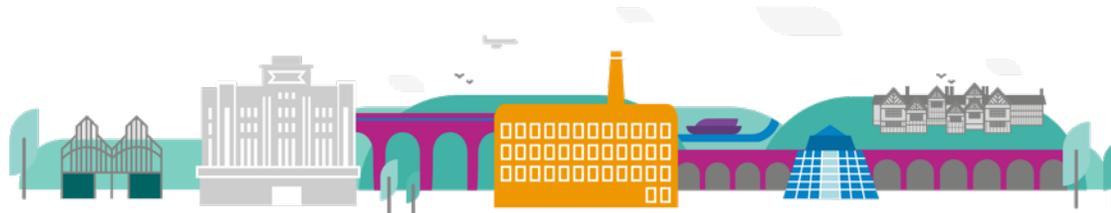

- A live simple tool which allows data that already exists on various systems to be collected in a single searchable view
- A tool for establishing levels of involvement across council services and what contact they have had with support services for adults and children
- Access to basic service involvement and key contact information of other professionals working with the person or family
- An initial source of information to have the right chats with the right people
- Updated every 24 hours
- A tool that allows you to search quickly and effectively saving time

Data Sets

We are in the process of adding new data sets

Users reported that Family Context is:

Helpful in several different use cases:

Easy to use

“I found it really easy – and I’m a bit of a dinosaur. At home I always get my kids to sort tech things”

New Assessments

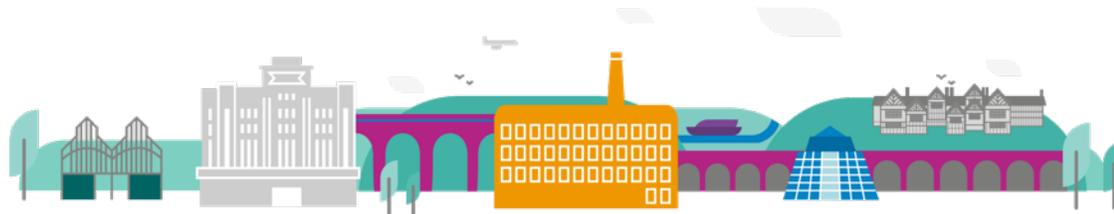

“for me being reassured that you’re prepped and ready to go out on an emergency, or a new assessment, or a new team around the school enquiry”

Quick checks with existing cases

“I used it in a meeting with school to check where the two other children were enrolled”

Other

“It’s useful for newly qualified social workers and trainees who don’t have contacts yet”

Demonstration of the Tool
