

Introduction to Web Development

19th July - 4th August

3 Weeks, every Wednesday & Thursday, 8+ hours a week

Stockport resident, aged between 18 and 30?
Curious about building web apps but never
taken the plunge?

CSS, HTML and JavaScript are the fundamentals of web development. This Summer, let us take you on a journey of discovery from “no previous experience” to creating your first interactive website.

What's on offer?

The course takes place both in-person and online.

In-person sessions run on **Wednesdays and Thursdays, 10am - 2pm** at Stockport Museum (Staircase House) in the town centre. (Map: <https://goo.gl/maps/1xUqqdWLB9A9fGbu9>).

Optional online sessions will take place on **Mondays and Fridays, 6pm - 8pm**. These will also be recorded for anyone who can't make it to catch up later.

Additional technical support is available through our online community platform, and you can request one-to-one support when needed with an expert mentor.

Who is this course for?

People who live in Stockport, aged 18 - 30 and not currently in full-time education.

We are especially looking to support those who are either unemployed or underemployed (e.g. on a zero-hours contract, or in a fast-food restaurant with unpredictable hours).

Complete beginners. Absolutely no coding experience is necessary, but you will need to be familiar with using a computer – for example to browse the internet, or to save and find files on your hard drive.

Someone who can make the commitment to attend the whole course. We strongly encourage you to attend every session but we will be available to help you catch up if you are unable to make 1-2 sessions due to prior commitments.

Those with access to a laptop or computer on which you have permission to install the software required for the course (i.e. not a mobile phone or tablet). If you only have a desktop computer at home, we can provide a laptop for in-person sessions.

Introduction to Web Development

19th July - 4th August

3 Weeks, every Wednesday & Thursday, 8+ hours a week

What's on offer?

During the course you will...

- **Gain a solid understanding of HTML, CSS, and JavaScript** – the building blocks of the web.
- **Develop an understanding of how websites are made**, and build two different websites to showcase your skills.
- **Receive battle-tested careers advice.** We'll help you sharpen your CV with a free 1:1 review, and give you career advice and support. Looking for a job? We can help with that too.
- **Get a real picture of what it's like to work in the digital industry.** What the different roles involve, and the different pathways into securing your first position.
- **Build industry-relevant experience** with common workplace tools such as Microsoft Visual Studio Code, Slack for team communications, and Miro for online presentations.
- **Sharpen up your real-world developer skills** – problem-solving, debugging, and pair programming. You'll also enhance your personal-professional skillset – organisation, communication, and collaboration.
- Receive a **Certificate of Completion** and a **Training Reference**.

Anything else I need to know?

We don't want cost to be a barrier to taking your first steps in coding, which is why this course is free. Lunch and refreshments will be provided every Wednesday. We can cater to most dietary needs, but please mention these when applying.

On a case-by-case basis, we will also make every effort to provide support with travel costs, childcare support, access to a computer, or anything else that might present a barrier to your taking part. If you have any questions about your particular situation, and how/whether we might be able to support you then please get in touch with us using the contact details below.

The venue for our in-person learning is fully accessible and we adopt a disability-first approach to our teaching. If you have specific access needs then please let us know in your application.

Get in touch!

We're always available, and happy to answer any queries you may have about any aspect of the course, or about your personal situation as a (potential) learner. You can reach out to us by email at team@shiftclick.uk, or via **WhatsApp on 07700 186400**.
